

Amt-Buddy

Tearing down Berlin housing barriers

An AI-powered compliance co-pilot unlocking Berlin's hidden sublease market

Sublet pool underutilized:

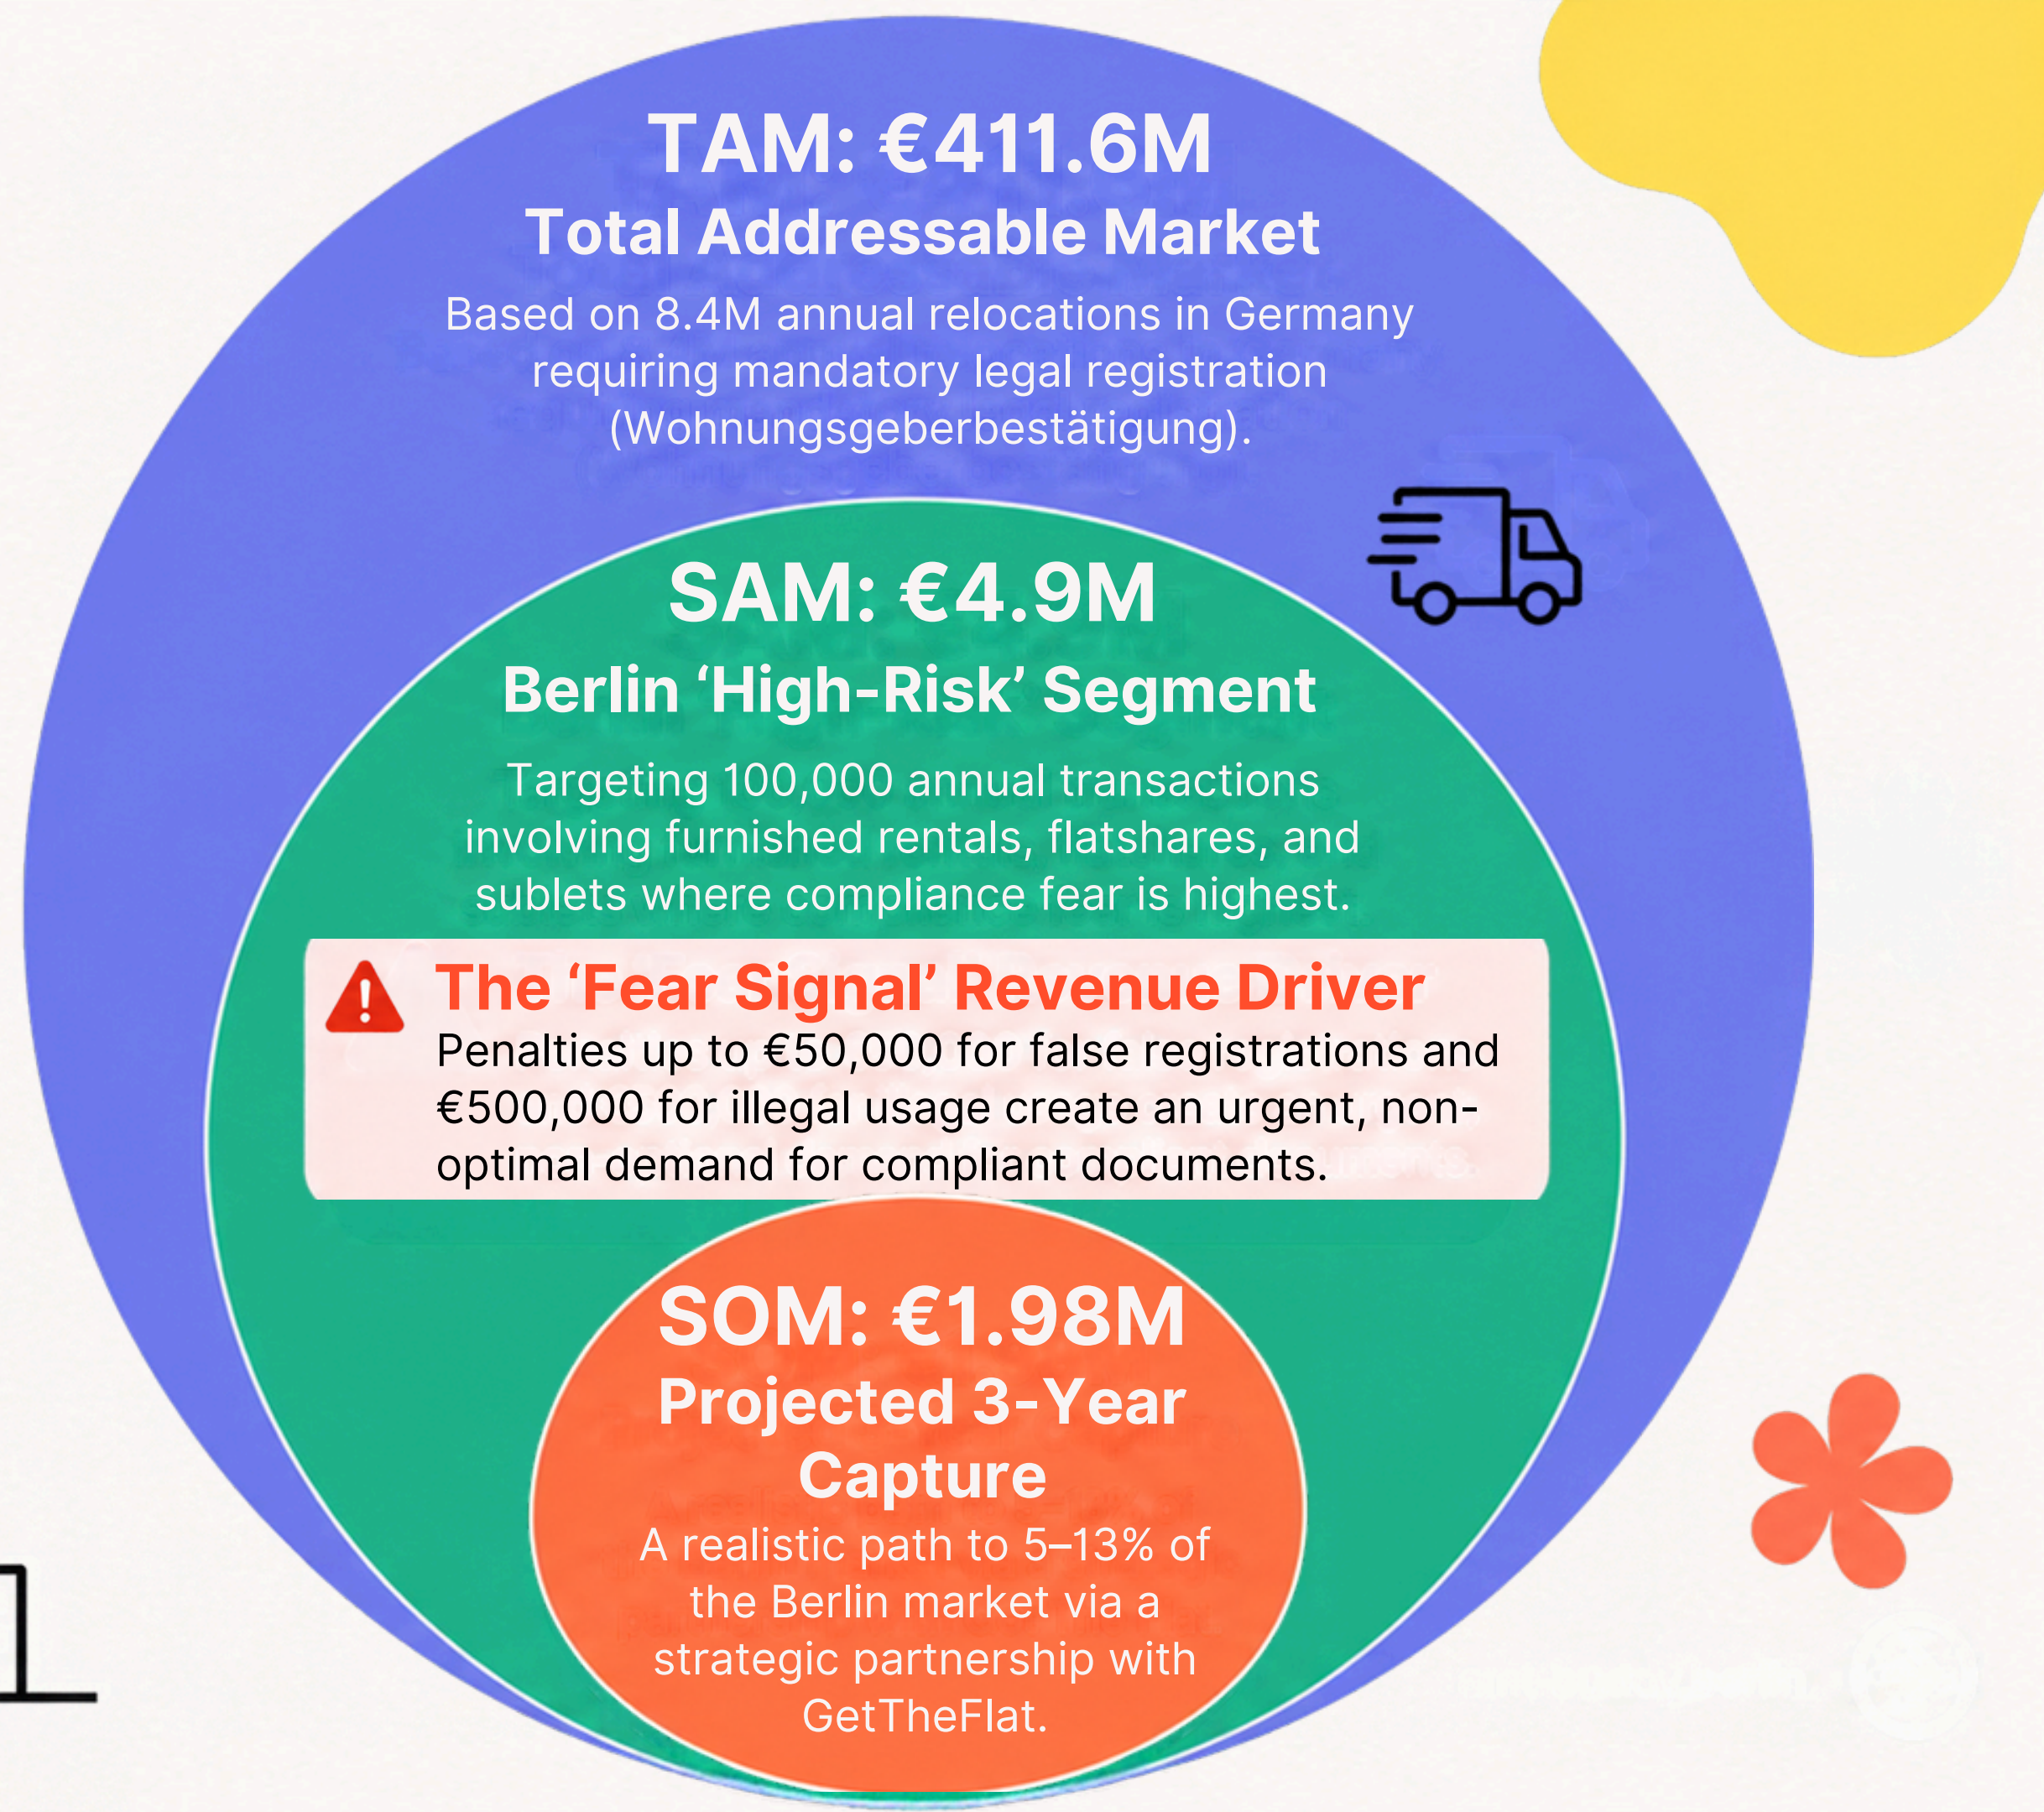

- Many tenants want to sublet but need to navigate obscure regulations
- Many flats only available on the invisible market (not on Get the Flat) to avoid potential fines

Market

A large and urgent market with real compliance needs.

The Anmeldung Paradox

A newcomer needs to open a bank account, get a tax ID, sign a long-term lease — for this they need Anmeldung, for which they need to already have long-term housing.

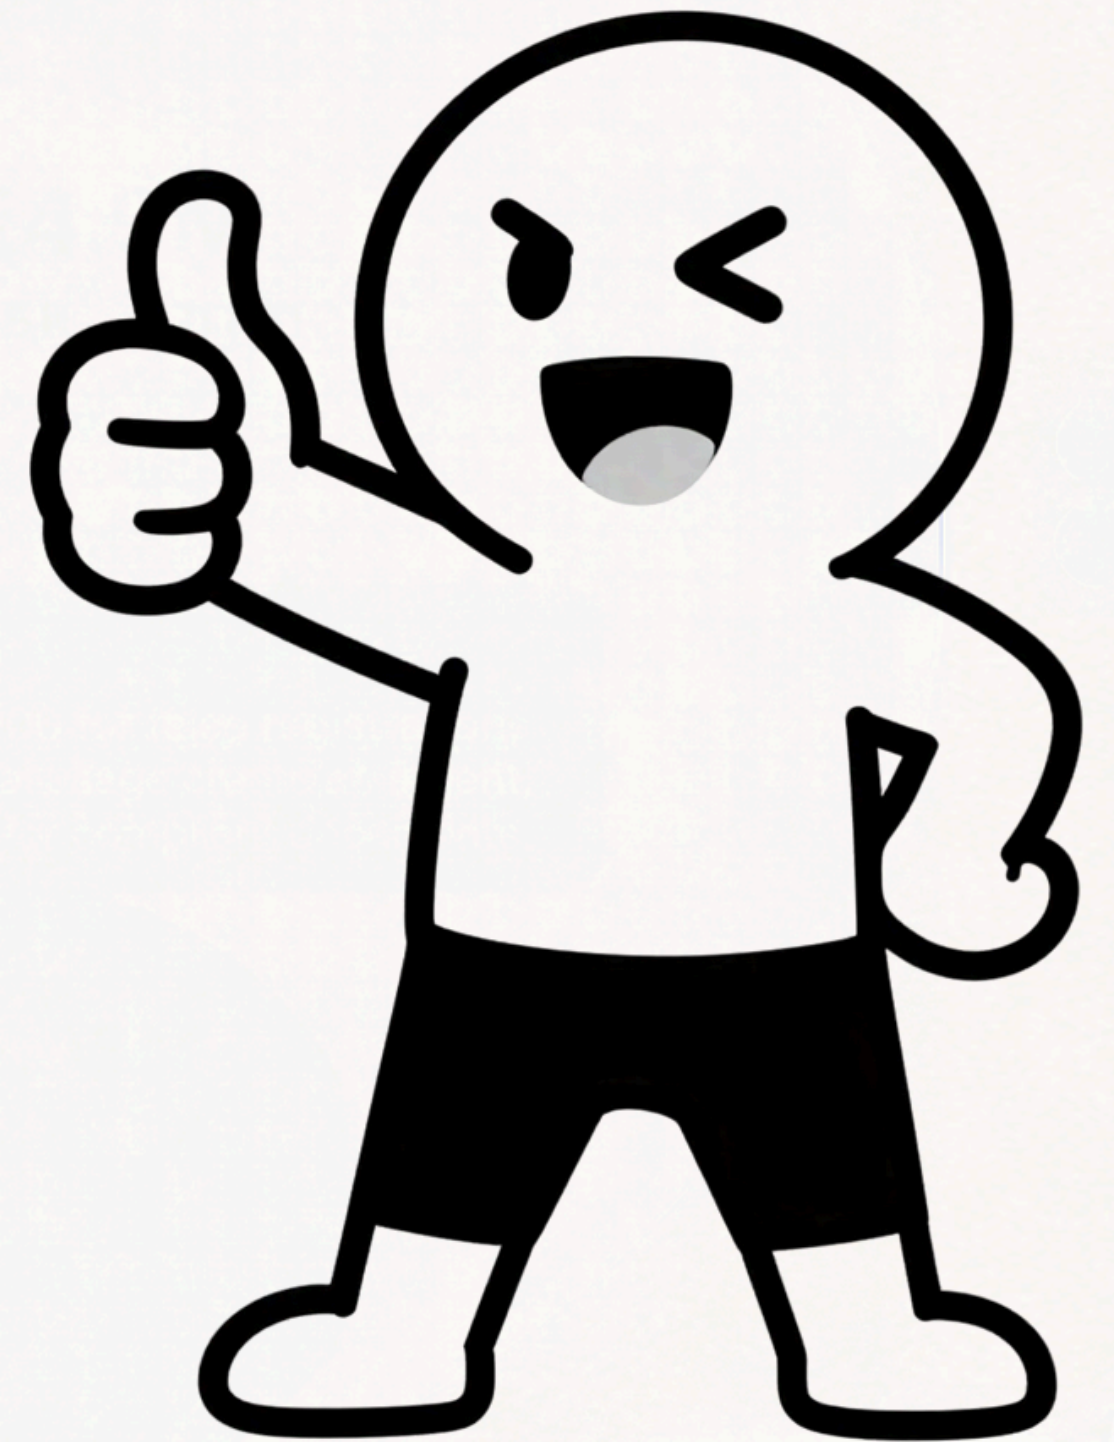

Short-term rentals and sublets aren't willing to issue Wohnungsgeberbestätigung for fear of fines.

The 60-Second Digital Handshake

- 🔍 Status quo: 3–4 weeks, manual legal checks, high fine risk, opaque UX
- 🔍 Amt-Buddy: 60 seconds to get compliance verification after lease upload
- 🔍 Transparent dashboard replaces uncertainty, legal in one digital handshake

Amt-Buddy

Built on Real Data, Real Automation

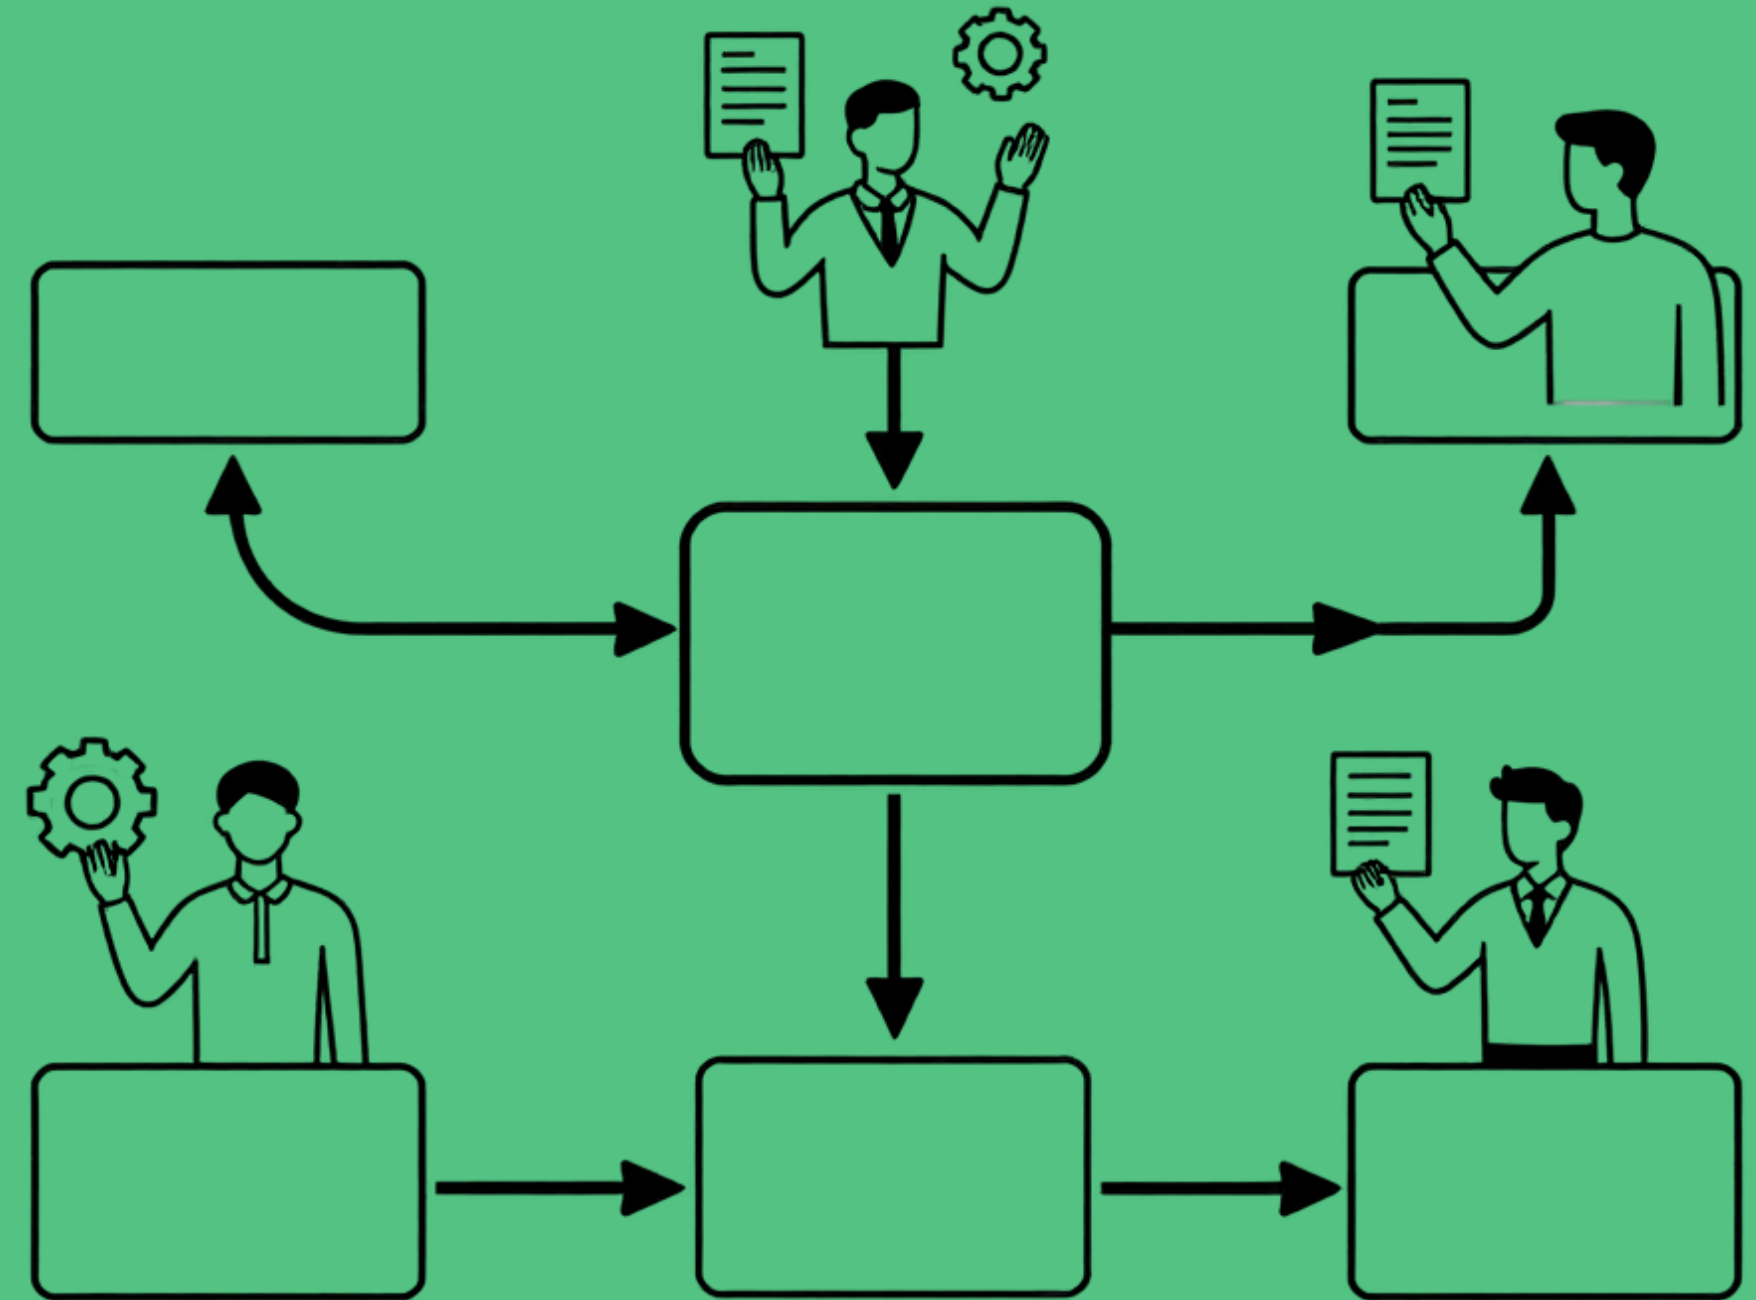

PDF parsing and OCR extracts landlord data in seconds

Lightweight FastAPI backend orchestrates specialised AI agents (Mietspiegel and Housing agent) against Berlin open-data API

Outputs: compliant sublease agreement, verified building age, location rent tier, and room to person density.

The Anmeldung Paradox

The Ultimate Play for Get The Flat

Increase flat pool on offer and
get ahead of the competition
